PROFESSIONAL SUMMARY

Senior Software Engineer with 8+ years of experience (since 2017) architecting and delivering production-grade Laravel/PHP web applications for international clients across FinTech, EdTech, Logistics, E-Commerce, HR, and B2B SaaS domains. Proven expertise in multi-tenant platforms, REST APIs, AI/GPT integrations, Stripe billing, Firebase notifications, and cloud-ready deployments. Consistent record of building complex role-based workflows, dynamic pricing engines, document processing pipelines, and real-time notification systems that replace manual operations with scalable, auditable software.

CORE TECHNICAL SKILLS

Backend	PHP 8+, Laravel 8–12, Eloquent ORM, Service Layer Architecture, REST APIs, Laravel Sanctum, Queues, Scheduler, Observers
Frontend	Bootstrap 5, jQuery, AJAX, Vue.js, Alpine.js, Blade Templates, Vite, DataTables, Chart.js / ApexCharts
Database	MySQL, Query Optimization, Complex Joins, Relational Schema Design, Dynamic Schema Management
AI / OCR	OpenAI GPT-4o / GPT-4.1 (Vision + Text), RAG Pipelines, Embeddings, Vector Stores, Tesseract OCR, AWS Textract
Payments	Stripe Checkout / Webhooks / Cashier, PayPal REST API, Apple In-App Purchase, Manual Ledger Billing
Cloud	AWS S3, AWS SES, Firebase FCM, cPanel, VPS, Git / GitHub, Cloudflare
Integrations	Twilio SMS, WATI WhatsApp, Clever OAuth, ClassLink OneRoster, Google Classroom, Zoom, Google Calendar, YouTube API, ID.me, QuickBooks Online, DomPDF, Maatwebsite Excel
Security	RBAC Middleware, CSRF Protection, Laravel Breeze/UI, Email Verification, OTP, Rate Limiting, bcrypt, Encrypted Cookies

PROFESSIONAL EXPERIENCE

Senior Software Engineer / Full-Stack Laravel Developer · Al-Akhzr Technologies — Lahore, Pakistan

Jan 2020 – Present

- Architect and deliver production Laravel SaaS platforms across FinTech, EdTech, Logistics, E-Commerce, and B2B verticals for international clients.
- Design multi-tenant, role-based systems with service layers, Eloquent observers, queued jobs, and Laravel Scheduler automation.
- Integrate AI/GPT-4o pipelines, Stripe billing, Firebase FCM, AWS S3, OAuth providers, and 15+ third-party APIs per project.
- Optimize MySQL schemas, complex queries, and eager-loading strategies for large concurrent datasets.
- Collaborate directly with international stakeholders through the full SDLC — from requirement gathering to cloud deployment and maintenance.

Independent / Freelance Laravel Developer · Self-Employed — Pakistan

Jan 2019 – Dec 2019

- Delivered CRM systems, QR verification platforms, event/ticketing tools, document management systems, and multi-role booking systems for local and international clients.
- Notable: Events Cabin (QR ticket issuance, organizer wallet, multi-gateway payments), QRIPHER (product QR verification SaaS, multi-tenant), Document Management System (multi-level categories, version history, RBAC).

Junior Software Engineer · Red Stonz Technologies Pvt Ltd — Peshawar, Pakistan Jan 2018 – Dec 2018

- Developed and maintained Laravel-based web applications; contributed to full-stack features, database design, and third-party API integrations.
- Gained hands-on experience in MVC architecture, team-based Git workflows, and Agile development practices.

Software Engineering Intern (PSEB-sponsored) · Red Stonz Technologies Pvt Ltd — Peshawar, Pakistan Jun 2017 – Dec 2017

- Completed an industry internship under the Pakistan Software Export Board (PSEB) program; trained in Laravel, PHP, MySQL, and professional software development workflows.

KEY PROJECTS

ClassNeighbors — K-12 EdTech SaaS Platform

Laravel 10 · PHP 8.1 · MySQL · OpenAI GPT-4o · Stripe · ClassLink OneRoster · Google Classroom · AWS S3

- Built a multi-tenant K-12 SaaS enabling anonymous student peer-nomination voting, AI-powered classroom social analysis, and school-wide reporting for individual teachers, schools, and districts.
- Integrated Clever OAuth + ClassLink OneRoster v1.1 for automated district-level roster provisioning — full delta-sync of organizations, teachers, classes, and students with audit logs.
- Implemented a RAG pipeline from scratch: document chunking → OpenAI text-embedding-3-small → vector store → GPT-4o Assistants API for classroom insights with stateful multi-turn conversations.
- Stripe (Laravel Cashier) tiered subscriptions across individual teacher, school, and district tiers; Google Classroom import; DomPDF/PhpSpreadsheet multi-format reports; 5-role RBAC.

ClassPeers — AI-Powered Classroom Insights Platform

Laravel 10 · Vue.js · MySQL · OpenAI GPT-4o · Stripe · ClassLink OneRoster · AWS S3

- Developed a parallel K-12 EdTech SaaS with Vue.js component islands; 6 automated report types (seating preference, behavioral nominations, cross-class comparisons) dispatched via queued email jobs.
- Engineered incremental AI embedding pipeline (EmbeddingMeta) to sync only changed class/student data to OpenAI vector stores — avoiding redundant API calls on every submission.
- Delivered ClassLink OneRoster v1.1 full tenant-to-student sync pipeline (95+ migrations), Clever OAuth, and Stripe billing with plan tiers, coupons, and trial periods.

StoraTax — AI-Powered Tax Management SaaS (Canada)

Laravel 10 · PHP 8 · MySQL · OpenAI GPT-4.1 · Stripe · Apple IAP · AWS S3 · QuickBooks Online

- Architected a bilingual (EN/FR) multi-tenant SaaS for Canadian individual filers, gig workers (Uber/Lyft Quebec GST/QST), and tax accountants managing multiple client portfolios.
- Built an end-to-end AI OCR pipeline: uploaded receipt images/PDFs → GPT-4.1 Vision extracts merchant, total, tax breakdowns (GST/HST/PST/QST) → structured JSON auto-populates forms; Tesseract as fallback.
- Platform-aware payment routing: iOS → Apple IAP; web → Stripe Checkout; multi-currency USD/CAD. Automated CRA-compliant PDF/Excel reports for T776, T1, and Quebec GST/QST.

Kontalio — Multi-Tenant Business Management SaaS

Laravel 8 · PHP 8 · MySQL · OpenAI GPT-4.1 · Stripe · Laravel Sanctum · REST API

- All-in-one SMB SaaS covering HR/attendance, invoicing, multi-warehouse inventory, e-commerce, and AI document intelligence across 25+ admin modules.
- AI invoice OCR via GPT-4.1 Vision (PDFs + images) returns structured JSON for instant form auto-fill; 5-role RBAC with per-module CRUD permission matrix; Quotation → Proforma → Invoice pipeline.
- REST API (34+ endpoints, Laravel Sanctum) for companion mobile app: auth, planning, attendance, check-in/check-out, and real-time timetable.

Limiria Distri — B2B/B2C E-Commerce & Inventory Platform

Laravel 11 · PHP 8.2 · MySQL · Stripe · AWS SES · DomPDF · Maatwebsite Excel

- Full commercial lifecycle platform for a French specialty distributor: storefront → multi-warehouse inventory → financial documents → real-time profit analytics.
- Custom profit engine across product catalog, orders, and invoices; SafeQuantityMutation Eloquent trait prevents race conditions; country-aware IP-geolocation shipping; 13-class notification system.

Sparetrac — B2B Industrial Spare Parts Ordering Platform

Laravel 9 · PHP 8 · MySQL · Blade · jQuery · DomPDF | order.sparetrac.com (Production)

- Dual-portal B2B platform: BOM-driven dynamic pricing engine where raw-material (INR/USD) updates cascade through linked BOMs to catalog and customer carts in real time.

- 3-tier staff RBAC (Admin/Contributor/Viewer) with 20+ JSON feature-key permissions; managed_by + contact_visibilities scoping across 30+ modules; 8 Excel/DomPDF export classes.

3PL Customer Portal — Logistics & Warehouse Operations Platform

Laravel 12 · PHP 8.2 · MySQL · Stripe Checkout · DomPDF · Bootstrap 5

- Multi-tenant logistics platform: inbound receiving (local + China multi-leg), single/bulk outbound fulfillment with label PDFs, warehouse stock with CBM tracking.
- Idempotent billing ledger with 6 charge types; full invoice lifecycle — DomPDF generation → email → Stripe Checkout with webhook confirmation → scheduled overdue cron.

USST Verification Platform — Industrial Safety Certification System

Laravel 10 · PHP 8.1 · MySQL · Google Maps API · Maatwebsite Excel · DomPDF

- Compliance platform for US ServTech: public certificate verification (QR deep links), dynamic per-category MySQL schema management, work-order job tracking, and inspection checklist workflows.
- Geolocation analytics: browser GPS → Haversine dedup (500 m) → 100 m cluster grouping → Google Maps visualization with OSM Nominatim reverse geocoding.

Design Production Management System (DPMS)

Laravel 12 · PHP 8.2 · MySQL · Blade · Bootstrap 5 · Spatie RBAC

- Multi-portal design production platform: 12-state request workflow, two-stage Complete Listings pipeline, workload-based auto-assignment, urgent FCFS marketplace with DB row locking.
- Centralized credit engine (priority multipliers, atomic ledger, revision overage charges); designer payroll automation (PKR credit-payout, tiered KPI bonuses, monthly scheduled generation).

MR. Mechanic — On-Demand Automotive Marketplace (Pakistan)

Laravel 12 · PHP 8.2 · MySQL · Laravel Sanctum · Firebase FCM · Laravel Breeze

- Marketplace backend (~100 API endpoints): geo-tagged service requests, mechanic bidding, job lifecycle, offline payment confirmation, dual ratings, and dispute resolution.
- Firebase FCM + queued Haversine proximity-matching — auto-notifies approved mechanics within 10 km (500-token FCM batches, 3 retries); multi-step KYC onboarding; distance-based PKR pricing engine.
- 14 PHP enums, 41 Form Request validators, OTP rate limiting, standardized JSON API envelope, ApexCharts admin analytics dashboard.

Invoice Scraper — AI-Powered Invoice Capture SaaS + Chrome Extension

Laravel 11 · PHP 8.3 · MySQL · GPT-4o · Chrome MV3 Extension · Sanctum · Google/Microsoft OAuth

- SaaS capturing invoices from IMAP/OAuth email inboxes and any website via a Chrome MV3 extension — both pipelines converge on a shared GPT-4o extraction API.
- GPT-4o Vision/text extraction returns 25+ structured fields in 15+ languages; two-layer deduplication (SHA-256 content hash + semantic invoice_number/vendor match); cascade lifecycle cleanup.

Parade Deck — Military Veteran Creator Economy SaaS Platform

Laravel 8 · PHP 8 · MySQL · Stripe · PayPal · Twilio · WATI · Google · Zoom · YouTube API · ID.me

- Full-stack SaaS for military podcast creators: event lifecycle (booking → QR check-in), Stripe Cashier + PayPal billing, awards voting, networking directory, in-app messaging.
- 15+ third-party APIs: Twilio SMS, WATI WhatsApp, Sendinblue/Brevo, SendGrid, HubSpot CRM, Google Calendar, Zoom OAuth, YouTube Data API v3, ID.me military verification, TikTok OAuth.
- 6 scheduled cron workflows (event reminders, Zoom alerts, YouTube sync), database-backed async job queue, and 10 Excel export classes.

EDUCATION

B.Sc. Computer Software Engineering · University of Engineering & Technology (UET) Peshawar, Pakistan.—
PEC Accredited 2013 – 2017

Program Focus & Key Competencies:

- Software Design & Architecture — UML, design patterns, component-based and layered system design; Software Construction & Development, Quality Engineering, Re-Engineering, and Project Management.
- Web & Database Engineering — Web Engineering, Database Systems, Operating Systems, and Computer Communication & Networks.
- Programming & Algorithms — Object-Oriented Programming, Data Structures & Algorithms, Discrete Structures, and Information Security.
- Professional Skills — Human Computer Interaction, Entrepreneurship, Technical Writing, Professional Ethics, and Final Year Project (two semesters).

- Mathematics — Calculus & Analytical Geometry, Linear Algebra, Probability & Statistics, and Applied Physics.

Accredited by the Pakistan Engineering Council (PEC). Programme governed by 12 PLOs covering engineering knowledge, problem analysis, solution design, modern tool usage, ethics, project management, and lifelong learning.
